## LETTER *from the* FOUNDERS

*In September 2000, Bill Gates visited a clinic serving a slum community in Delhi, India and administered oral polio vaccines as part of the global effort to eradicate polio.*

The last few decades of the 20th century brought an incredible burst of innovation, particularly in medical science and information technology. But many of those innovations have yet to reach people living in poverty. The central challenge of the decades ahead will be to share lifesaving advances such as vaccines and new medicines, as well as the benefits of the revolution in information technology, with those who need them most.

### **Global Health Equity**

The primary goal of our global health grants is to reduce what Dr. William Foege, our senior health adviser, calls the “unconscionable disparity” that exists between the way that we live and the way that the people of the developing world live.

Our focus on global health equity was born of a growing realization that many of the diseases that have been all but eliminated in this country, such as measles, kill and disable nearly 1 million children in the developing world each year. Our grant making is grounded in the belief that the death of a child in Africa is no less tragic than the death of a child in America, and the understanding that those of us who were born in rich countries have a fundamental responsibility to help those who weren't.

In the 1980s, a combination of political will and unprecedented cooperation among governments, health officials, NGOs, corporations, and other donors brought global vaccination rates from 5 percent to 80 percent for six basic childhood diseases: measles, diphtheria, pertussis, tetanus, polio, and tuberculosis. Unfortunately, as political will among donors and developing nations tapered off, those rates declined.

We are optimistic that the world can again attain, and even surpass, those rates, while adding several newer vaccines that are used routinely in the developed world. Belief in the premise that children have a basic right to lifesaving vaccines is gaining momentum. Several countries, including Norway, the United Kingdom, Canada, and the United States, have contributed to the Global Alliance for Vaccines and Immunization in order to purchase and deliver vaccines to the 74 poorest countries in the world. But we need more resources to reach every child, with every available vaccine.

And we need to develop new vaccines to stop malaria, tuberculosis, and AIDS. These diseases are destroying families and communities, and rolling back hard-fought gains in developing nations. Africa is home to 70 percent of the adults and 80 percent of the children living with HIV in the world, and, according to UNAIDS, has buried three-quarters of the more than 20 million people worldwide who have died of AIDS since the epidemic began. In hard-hit nations such as South Africa, AIDS is projected

## Letter from the Founders (continued)

---

*At the Huay Ma Hin Fon Well Baby Clinic in Chiang Rai, Thailand, Melinda Gates administers oral polio vaccines to children that have traveled from any one of the 11 surrounding villages. Immunization coverage for these hill tribe villages has been low relative to the general Thai population.*

to reduce the gross domestic product by 17 percent over the next decade, removing \$22 billion from an already fragile economy. To reverse the course of the epidemic, we must aggressively pursue a comprehensive approach that emphasizes preventive measures that will enable individuals to protect themselves and others, and we must marshal the will and resources necessary to develop and distribute an AIDS vaccine.

Improving health is key to reaching other development goals, such as reducing poverty. Some worry that by reducing the burdens and deaths caused by disease we may be inadvertently contributing to another serious problem: rapid population growth and high fertility. Actually, the reverse is true. Studies show that mothers voluntarily limit the number of children they have when they have confidence that existing children will

survive. We need to empower women by providing voluntary family planning services to the 150 million women in developing nations who want to prevent or delay their next pregnancy, but lack access to contraception.

### Helping All Students Achieve

Here in the United States, research consistently shows that education is a top concern of the public. The foundation's education programs were launched in March 2000, with a \$350 million commitment to support education improvements in three priority areas over three years. Our investments support model schools and districts; provide professional development opportunities for teachers, principals, and superintendents; and help to eliminate financial barriers to higher education by providing scholarships.

In the last year, the foundation has helped 19 public school districts, 13 individual schools, and 11 school networks begin the process of creating smaller, more personalized learning environments. Though many of these recipients are clustered in Washington state, the portfolio represents schools from Alaska to Boston, San Diego to Cleveland. Efforts are also under way to improve the leadership and technology training of teachers, principals, and superintendents in every state. Finally, the foundation has embarked on three scholarship programs: one for low-income students in Washington state, a second for low-income minority students in all states, and a third that allows outstanding scholars and leaders from every country in the world to pursue graduate degrees at Cambridge University in England.

### Bridging the Digital Divide

This year marked the midway point of our commitment to bring computers with Internet access to every public library serving a low-income community in the United States and Canada. The Library Program was our first large-scale, private philanthropic effort.

**Letter from the Founders (continued)**

---

In reaching this milestone, Library Program trainers have logged more than 11 million air and road miles, traveling to libraries in 18 states, the District of Columbia, and 12 Canadian provinces and territories. Approximately 28,978 computers have been installed in communities stretching from the Yukon Territory to Texas and from New York to California, providing free access to information to roughly 145.3 million people—almost half the population of North America.

We believe that our efforts, combined with other creative efforts from diverse groups that range from international agencies to local Boys and Girls Clubs, are making a dent in the digital divide. The U.S. National Commission on Libraries and Information Science recently issued the results of its 2000 Internet Connectivity Study, which found that in the last two years Internet connectivity in public libraries has increased from 83 percent of libraries being connected to more than 95 percent. In the same time period, libraries have also nearly doubled the number of public access workstations.

An independent assessment of the Library Program's impact in the initial half-dozen states shows positive results. According to the study, students and low-income patrons use library computers most frequently and for the longest periods of time. And library computers are the only source of access for more than half of those who are unemployed but looking for work. Also notable is the fact that library traffic and staff morale increased significantly in libraries that received computers and training.

This new century brings with it exciting advances in health and learning. We all share the responsibility of ensuring that these opportunities are not out of reach for the people who need them the most.

*William H. Gates*      *Melinda J. Gates*

## LEADERSHIP

### BILL & MELINDA GATES FOUNDATION LEADERSHIP AND EXECUTIVE COMMITTEE

#### Founders

Bill Gates, III and Melinda Gates

#### Co-Chairs

William H. Gates, Sr. and Patty Stonesifer

#### Executive Committee

Richard Akeroyd, Executive Director, Libraries and Public Access to Information

William H. Foege, M.D., M.P.H., Senior Health Advisor

Allan C. Golston, CPA, Chief Financial and Administrative Officer

Terrence Meersman, Senior Program Officer

Gordon W. Perkin, M.D., Director, Global Health Program

Tom Vander Ark, Executive Director, Education

#### Melinda French Gates

Cofounder, Bill & Melinda Gates Foundation

Melinda French Gates is involved in a variety of philanthropic endeavors that support the arts, social services, and education, in addition to her time devoted to managing the grantmaking of the Bill & Melinda Gates Foundation. Gates earned a bachelor's degree in computer science and economics from Duke in 1986 and a master's degree from Duke's Fuqua School of Business in 1987. Upon graduation, she joined Microsoft where she played a leadership role in the development of many of the company's multimedia and Web-based products. Two years after she married Microsoft cofounder Bill Gates, she retired to care for their young children and to contribute her organizational talents and leadership to the community.

#### William (Bill) H. Gates, III

Cofounder, Bill & Melinda Gates Foundation

Bill Gates is Chairman and Chief Software Architect of Microsoft Corporation. While at Harvard, Gates developed the programming language BASIC for the first microcomputer, the MITS Altair. In 1975, Gates launched Microsoft with Paul Allen to develop software for personal computers. He is actively involved in key management and strategic decisions at Microsoft, and

## Leadership (continued)

---

plays an important role in the technical development of new products. Gates has also co-authored the *New York Times* bestseller *The Road Ahead* and *Business @ the Speed of Thought*. Proceeds from both books have been directed toward nonprofits serving young people.

### **William H. Gates, Sr.**

Co-Chair and CEO, Bill & Melinda Gates Foundation

Bill Gates, Sr. earned his bachelor's and law degrees from the University of Washington, following three years of U.S. Army service in World War II. Gates, a founding partner at Preston Gates & Ellis, has served as president of both the Seattle/King County Bar Association and the Washington State Bar Association. Gates has served as trustee, officer, and volunteer for more than two dozen Northwest organizations, including the Greater Seattle Chamber of Commerce and King County United Way. In 1995, he founded the Technology Alliance, a cooperative regional effort to expand technology-based employment in Washington. He also has been a strong advocate for education for many years, chairing the Seattle Public School Levy Campaign in 1971 and serving as a member of the University of Washington's Board of Regents since 1997. Bill and his late wife, Mary Maxwell Gates, raised three children: Kristianne, Bill, and Libby. Now married to Mimi Gardner Gates, Gates continues to lend his vision and skill to many civic programs, cultural organizations, and business initiatives.

### **Patty Stonesifer**

Co-Chair and President, Bill & Melinda Gates Foundation

Patty Stonesifer helps lead the foundation's mission to improve access to advances in global health and learning for all people as we move into the 21st century. In addition to her responsibilities with the foundation, Stonesifer is an active community volunteer, donating both time and resources to a number of regional nonprofit organizations, including the YWCA of King County and the Seattle Foundation. She also is on the board of Amazon.com and Viacom Inc. Prior to being asked by Bill and Melinda Gates to launch the work of the foundation, Stonesifer held a senior vice president position at Microsoft and ran her own management consulting firm, working with such corporations as DreamWorks SKG.

## Leadership (continued)

---

### EXECUTIVE COMMITTEE

#### **Richard Akeroyd**

Executive Director, Libraries and Public Access to Information

Richard Akeroyd joined the foundation in December 1997, having spent 25 years working with public libraries in a variety of roles. Most recently, he served 11 years as Connecticut State Librarian, responsible for statewide library operations and policy implementation. Akeroyd has held leadership positions at the Denver Public Library and was program and planning consultant to the White House Conference on Library and Information Services. He began his career at the University of Connecticut Library, with additional service at the Manchester Public and Connecticut State Libraries. Akeroyd holds a master's degree in library science from the University of Pittsburgh and a bachelor's degree from the University of Connecticut. He also studied at the University of Connecticut, focusing on advanced coursework in educational media and instructional technology. He is a longtime member of a number of professional associations, including the American Library Association, the American Society for Information Science, and the Coalition for Networked Information.

#### **William H. Foege, M.D., M.P.H.**

Senior Health Advisor

William Foege joined the foundation in September 1999 after 13 years at the Carter Center, where he served in a variety of executive positions. He serves as senior investigator on child development at the Task Force for Child Survival and Development as well as Presidential Distinguished Professor of International Health at the Rollins School of Public Health. In 1997 he was named a fellow of the London School of Tropical Medicine and Hygiene. Dr. Foege helped form the Task Force for Child Survival in 1984 to accelerate childhood immunization. In the 1970s he worked in the successful campaign to eradicate smallpox and served as director of the U.S. Center for Disease Control. He attended Pacific Lutheran University, received his medical degree from the University of Washington, and earned his Master's in public health from Harvard University.

#### **Allan C. Golston, CPA**

Chief Financial and Administrative Officer

Allan Golston joined the foundation in January 2000 and oversees the financial and administrative functions. His professional background includes nonprofit healthcare, software development, consulting, education, and public accounting. Golston serves as a trustee for Artist Trust and Make A Wish Foundation serving Washington, Alaska, Montana, and northern Idaho. He is an alumnus of INROADS Denver and is a fellow of the British-American Project. Golston earned his MBA from Seattle University and his bachelor's degree from the University of Colorado.

**Leadership (continued)**

---

**Terrence Meersman**

Senior Program Officer

Terry Meersman brings 22 years of program and management experience with several nonprofit organizations, including Save the Children Federation, the Pew Charitable Trusts, and World Learning. While at Save the Children, Meersman held several positions, including director of refugee programs, executive vice president/chief operating officer, and acting president. As venture fund officer for Pew Charitable Trusts, Meersman helped restructure a grantmaking program in population and environment. Meersman served as director of policy analysis for the Seattle City Council. Meersman joined the foundation in October 1998 and served as the first head of finance and administration during the start-up phase. He now directs grants administration and serves as senior program officer.

**Gordon W. Perkin, M.D.**

Director, Global Health Program

Prior to joining the foundation, Dr. Perkin served as president of the Program for Appropriate Technology in Health (PATH), an international nonprofit dedicated to improving health, especially of women and children. As a physician with more than 35 years of experience in international health and family planning, Perkin also spent 14 years with the Ford Foundation, where he worked as program officer in a variety of international health and population projects. He served as a long-term consultant to the World Health Organization (WHO) on the design and research strategy of the Special Programme in Human Reproduction and has consulted with several other WHO programs. He served as a member of the Committee on Contraceptive Development of the National Academy of Sciences and as a board member of the Planned Parenthood Federation of America, the Alan Guttmacher Institute, and the National Council for International Health.

**Tom Vander Ark**

Executive Director, Education

Prior to joining the foundation, Vander Ark was the superintendent of public schools in Federal Way, Washington, where he established technology benchmarks and led innovative and progressive programs that put Federal Way in the forefront of the national school reform movement. With a wide-ranging business background, Vander Ark was one of the first business executives recruited to run a public school district. Prior to leading Federal Way Public Schools, Vander Ark ran a consulting practice for Cap Gemini and was senior executive for a \$5 billion national retailer. Vander Ark has been actively involved in civic and educational causes, including United Way, Boys and Girls Club, and Boy Scouts, and he is a member of numerous national educational associations.

## GRANT INQUIRIES

---

### APPLYING FOR A GRANT

The foundation received close to 20,000 requests for funding in 2000. About half came via regular mail, the other half via email. Regrettably, the foundation is able to provide funding to only a relatively small number of qualified organizations.

Although the size of the foundation's endowment has grown significantly in recent years, to approximately \$21.1 billion at the end of 2000, these assets pale in comparison to the size of the challenges we aim to tackle.

The foundation seeks to be strategic with its resources, favoring preventive approaches and collaborative endeavors with government, philanthropic, and not-for-profit partners when possible. Grantmaking is guided by the principle that in order to achieve lasting, large-scale change, philanthropic efforts must incorporate strategies to encourage effective public investment and to leverage private sector market potential. Priority is given to investments that serve as a catalyst to quicken the pace of progress, and to efforts whose net effect is to augment, not supplant, government funding streams.

The foundation will consider letters of inquiry from tax-exempt, charitable organizations whose requests fall within the program guidelines summarized on our Web site. Please review the detailed program guidelines for each giving area before submitting a request. The foundation neither encourages nor generally considers unsolicited proposals. In keeping with its charter, the foundation cannot accept proposals that benefit specific individuals or that serve exclusively religious purposes.

## FINANCIAL REPORTS

### BILL & MELINDA GATES FOUNDATION

#### Statement of Financial Activities

As of December 31, 2000

in millions

Cash & Cash Equivalents	\$ 38.3

STORIES OF INSPIRATION

PARTNERS

PARTNERS *for* TB CONTROL

“WHAT I LOVE MOST ABOUT OUR MEETINGS is that they are contentious!” offers Dr. Kim, describing the sparks that sometimes fly when some of the brightest minds in the fight to stop TB gather together to share information and plot strategy. The progress being made at these gatherings ripples through hard-hit places like Carabayllo, Peru, where the DOTS strategy is saving lives.

PROFILE

*Dalia Guerra explains treatment to a new patient with MDR-TB*

**Dalia Guerra — Changing her Community and Her Future**

Dalia grew up in the poverty-ridden community of Carabayllo, outside of Lima, Peru. Determined to change her future, she enrolled in the local college. When her family could no longer afford the tuition, she was forced to end her education and, with it, her hopes of becoming a nurse. Now, funding provided to Carabayllo through PARTNERS for TB Control has paid her tuition while she works as a healthcare volunteer. She is currently finishing her thesis and about to receive her bachelor’s degree.

“It is so good to help these people that had no chance of a cure in the past. Some were considered terminal patients. Now the miracle has happened... they are cured, alive, and with more years to enjoy time with their families. They can make their dreams and aspirations reality. I am very fortunate to be able to help them.”

## Partners for TB Control (continued)

## PROFILE

*Dr. Bayano reviews an x-ray.*

### Dr. Jaime Bayano – Reawakening a Community’s Spirit

Dr. Jaime Bayano has worked in the community of Carabayllo just south of Lima, Peru, for most of his professional life. He is intimately familiar with the insidious consequences of tuberculosis and the obstacles that can prevent effective treatment: slow and cumbersome methods of diagnosis, complicated drug regimens, unaffordable pills, and fear and distrust of the healthcare system trying to deliver the cure. When he learned that PARTNERS for TB Control was going to fund tuberculosis treatment for his community, he was stunned. “I couldn’t believe that anyone from the outside was willing to support our treatment plans and work in our poor neighborhood,” he says. “These resources came at such a critical time for us.” The grant reached Carabayllo in time to buy additional drugs and train new healthcare volunteers to deliver them. “When we got the news that the first patient had been cured after being sick for so many years, we had such a party!”

Most heartening to Dr. Bayano, the newly invigorated program’s success has reawakened a sense of community that had been waning. Financial support for volunteer training builds on traditional values and local support systems that had begun to lose hope in the face of poverty, chronic illness, and a sense of abandonment by higher officials. Some funds are being used to pay for higher education in exchange for volunteer work. Many students are becoming nurses, health aides, or doctors, infusing the neighborhood with a higher employment rate and standard of living.

## BUILDING A NETWORK

*A support group meeting for TB patients*

Dr. Jim Kim likes to describe multidrug-resistant tuberculosis (MDR-TB) as “Ebola with wings.” It’s an infection with the capacity to travel the globe, multiplying and increasing in virulence on a geometric scale. As director of the Program in Infectious Disease and Social Change at Harvard University, Dr. Kim has a unique understanding of the cultural and political factors influencing diseases such as tuberculosis, which vies with HIV/AIDS for killing more people than any other infectious agent on the planet. The

bacteria responsible for causing this potentially fatal lung disease can usually be killed with a combination of several antibiotics taken over six to nine months. But, resilient and adaptable, tuberculosis organisms that are not eradicated during initial therapy will emerge highly resistant to the same antibiotics that were originally curative. Each time a patient is left only partially treated, the risk of developing MDR-TB

### Partners for TB Control (continued)

---

is ignited. To stop its spread, accurate and complete drug dosing is critical. Effective TB treatment models that can help prevent resistance exist, but lack of organization, manpower, and affordable medications often limit their potential.

A \$44.7 million grant from the Bill & Melinda Gates Foundation is being used to create a new coalition, PARTNERS for TB Control. PARTNERS stands for Partnership Against Resistant Tuberculosis, a Network for Equity and Resource Strengthening. Dr. Kim's group at Harvard will join forces with the World Health Organization, the U.S. Center for Disease Control, the Massachusetts State Laboratory Institute, and the Task Force for Child Survival and Development.

Any one of these groups can claim a proud record in the TB battle. But combined, they carry the scientific clout, field experience, and financial resources to build the groundwork needed to fight MDR-TB at a global level. Uniting their talent vastly multiplies their independent chances for eradicating TB. "What I love most about our meetings is that they are contentious!" offers Dr. Kim. "We meet face to face and discuss every detail: When should lab tests be done? When should new drugs be given? How will our responsibilities be divided? And we don't leave the table until we have those problems solved."

### GRANT SUMMARY

---

#### Harvard Medical School

\$44,712,896 over 5 years to support PARTNERS for TB Control.

STORIES OF INSPIRATION

COMMUNITIES

FIRST PLACE

ACCORDING TO KEAIRA, homeless kids like herself sometimes think, “Why can’t I be like other people? Why do we have to live in a shelter? Kids feel scared; sometimes they cry even. But,” says Keaira, “I don’t worry at First Place.” Keaira and other homeless students at First Place eat warm meals, receive clothing and nursing attention, and participate in counseling and other therapeutic activities at school, which help them heal from the trauma of being without a home.

PROFILE

**Keaira is a sixth-grader at First Place. She lives with her grandmother and is the oldest of six children, all girls. Her grandmother cares for the children. In her words...**

“I live in a shelter right now. Me and my family just moved here to Seattle. We came from Michigan. We stayed with my uncle for a while. I’ve lived in California and Missouri, too. All the other kids here are in shelters, too, and it makes me feel OK that I’m not the only one that’s homeless, without a house. I know now we’re not the only ones. It helps me to feel safe. We talk about it during class. We gave speeches in Olympia (to the legislature) and a whole bunch of kids said that First Place helps us feel safe because we’re all in the same boat. What’s in the past is past, but here you can express it and talk about it, not just pass over what happened.

**First Place (continued)**

---

"They help us to read and do math. The volunteers come in to help us with our math and stuff. Our teacher makes me feel good by saying how smart we are. My favorite subjects are P.E. and swimming and math. I've got good handwriting, but I don't like writing much. I like to read adventure stories. They don't yell at you if you make a mistake here. They teach us well. You have counseling here, and if we get in trouble they talk to us and make us feel good.

"Kids without homes sometimes think, 'Why can't I be like other people, why can't I have a house? Why do we have to live in a shelter? Why can't we have our old house back?' Kids feel scared; sometimes they cry even. But I don't worry at First Place, 'cause the other kids don't make fun of me. I used to go to another school and when I told them I lived in a shelter, the other kids said, 'Well, we can't hang around you 'cause you live in a shelter. You can't keep a house.' But my friend said, 'I don't care if you're in a shelter.' So she was my real friend.

"The computers work good here. Everyday we go to the computer lab to do our reports. We looked on African Encarta for poems for women's Black History month. All us girls did this. We looked up Maya Angelou, and I memorized her poem 'Woman's Work.'"

---

**PROFILE**

---

**Barbara Bennett, Ph.D., is a child counselor and a founder of First Place, a school for homeless children and their families. In her own words...**

"In 1989, there was a group of families living at a homeless center in Seattle, and they weren't able to enroll their children in school because they had no permanent address. This has changed now, but at that time it was a barrier that homeless families faced. So a group of us began talking about the possibility of forming a school for homeless children. We opened First Place the following spring, and we became part of the Seattle School District's plan for serving homeless families. Most of the families enrolled at First Place are living in shelters. Some are living on the streets, in cars, and in Tent City (an encampment of homeless people in Seattle).

"I began looking at how to provide counseling to these kids, even if we only had them for a short time. I felt like there must be something we could do. So I began looking into play therapy. I started out with a suitcase of toys, and I found right away that children were able to get something therapeutic out of the experience. We have three counselors here now to work with the children, and they really look forward to their time with us.

**First Place (continued)**

---

“Kids need an opportunity to play out, in therapy, what’s going on in their lives and to share that with a caring adult who can help them with that burden. Everyone in the family is trying hard to hold it together, and there is often not time or space for children to share what they are feeling. Children take a lot of responsibility for what’s going on in the family. They worry about whether their parents might have moved while they are at school or whether their mom is going to be in jail or abusing some kind of drug. They worry about their parents to a greater extent than most children would.

“They’ve experienced so many losses, and they’ve rarely had the chance to express it. If they are able to play it out and share it in some way, it really lessens the burden for them. You can’t take it away. You can’t take away the problems that they’re dealing with. But if you can listen to them and be there, it makes a big difference in their lives.”

**PROFILE**

---

**Obsa attends First Place. He’s ten years old. He was born in Texas; his family immigrated to the United States from Ethiopia. In his words...**

“I really like this school. The people are nice. They give clothes away if you don’t have any. They care about you. I was kind of nervous on my first day here ‘cause I didn’t know nobody. My mom, my brother, me—we’re all living in a shelter. If a new student came to this school, I would just show ‘em around, and I’d tell the girls and boys to be nice. I’d say, ‘Don’t make fun of her if she has a problem.

Be friends with her.’ See, we are all the same here, ‘cause we all live in shelters. At other schools, they would tease you if they knew. But here, everyone lives in a shelter, so they can’t make fun of you. We get along here. I’ve been through shelters, no money sometimes, going to food banks—I’ve done all that. I’d tell a new student, ‘Don’t worry; your mom’s getting help. They’re trying to get her housing. You’re safe at this school.’

“Reading and math and science are my favorite subjects. I’ve read all the Harry Potter books. I want to learn how to dissect frogs. Here, they take things like math real serious. Our teacher doesn’t want us to mess around. She wants us to get smart and get ready for middle school. I appreciate that. We use computers in our class, and they call me Mr. X-Whiz. If the computers mess up, they all come to me to fix it. I like to go on the Internet to play games. I do research, too, like for International Women’s Day. All the women who fought for rights have their day that day. I do email, too. I email my friends if I’m going to their house, and we send messages like ‘How’s it going at your house?’ and ‘What are you doing Saturday?’

“The new school will give us more room, and I’m very thankful for that.”

## First Place (continued)

## A HOME FOR LEARNING

Homelessness has proven to be a tenacious foe. Twenty years ago homeless men, women, and families began to show up in alarming numbers on American streets. Today, there are an estimated 2 million people in the United States who have no home, and more than 500,000 school-age children are counted among them. A shortage in affordable rental housing and deepening poverty in the United States account for the rising dislocation. Cuts in federal housing programs mean that only 30% of poor Americans who are eligible for housing assistance actually receive it. While many families struggle to meet basic needs, a growing number simply are not making it. Forty percent of homeless people are employed, yet wages do not keep pace with housing costs. A lay-off, an illness, a family crisis: any of these can push a family out of their home and onto the streets. Many others suffer from a host of hardships—from mental illness to substance abuse, that leave them hampered and outside the boundaries of the nation's prosperity.

Rootlessness and poverty take a particular toll on children, who may not understand the real causes of their predicament. Like most children, homeless children relate the calamities around them to their own actions, and often blame themselves. The loss of home is often just one of many adversities they must contend with. Many children must bear adult responsibilities, caring for siblings and even parents, long before their time. For others, violence and drugs are part of their everyday landscape. School attendance, much less a quiet place to read and study, is problematic for children moving from place to place.

First Place is a unique school in Seattle that offers safety, stability, and a good education to children K-6 who have no place to call home. First Place meets the educational and social needs of the children—but doesn't stop there. "We enroll whole families in this program," says Executive Director Doreen Cato. Children eat warm meals, receive clothing and nursing attention, and participate in counseling and other therapeutic activities at school, which help them heal from the trauma of being without a home. Classes are small, and individualized lesson plans help to meet each child where she is, so she can begin to move forward with her studies. An on-site after-school program offers students an additional two hours in their day to feel safe and to enjoy themselves. A Family Stabilization Program helps parents acquire housing, healthcare, and job training to become better able to support themselves and their families.

First Place recently purchased a new building and has begun renovation of an existing building—an old Jewish synagogue that is taking on new life. The school buildings, when they open in fall 2001, will be part of an envisioned community center that will house the school, a new library, community meeting rooms, and a parent job and resource center. Last year, First Place had to turn away 100 students for lack

**First Place (continued)**

---

of space. The new buildings will enable the school to meet the needs of more children and to add grades 7 and 8. A library and a computer lab, with equipment and software provided by an earlier grant, will also be lodged in the new facilities. Staff and children alike have received extensive computer training under the program.

**GRANT SUMMARY**

---

**First Place**

\$1,000,000 over 12 months to support the capital campaign for a new facility and expand the education and health services for children and families who are homeless or in transition.

STORIES OF INSPIRATION

CONNECTING

NORTHWEST TERRITORIES

Photo Leslie Leong

IN THE SNOW-SWEPT TERRAIN of the Canadian Northwest Territories, a system of cyber-libraries in six remote communities provides a promising model for connecting rural residents to the world. Computers with Internet access, along with training and software, will enable residents like Karen Kotchea to enter a world far beyond the territorial boundaries, to participate in the Information Age, and to pursue their own interests in education, communication, research, and entertainment.

PROFILE

**Karen Kotchea, 32, has recently returned to school and is learning to use the computer. She lives in Fort Liard with her children and took part in a recent computer training session in the new cyber-library.**

"I am trying to finish high school and to upgrade my skills. When my six- and eight-year-old children go off to school in the morning, I go off too. We all go to school now. I left school a long time ago, before finishing, when I was just 11 or 12. My parents wanted to live out in the bush with us. They liked the traditional ways and wanted me to learn them. I didn't have a choice then. My parents were the boss of me—that's just how it was. When I was older, I guess I was a little angry about being pulled out of school, because I liked it, especially math.

### Northwest Territories (continued)

---

"We had a cabin, and my parents were trapping. It was absolutely beautiful out there. There were spruce, birch, aspen, moose, fox, lynx, birds of all kinds. Snow from October to April. I was glad to learn the traditional ways. I can tan a moose hide and weave a birch bark basket, things I wouldn't have learned in school.

"Now I want to finish school. I had a job for a while, but I had to quit because I didn't know the computer. So I thought, well, I'll just go learn. I don't really know much about computers. I'm just learning. I'm doing OK; I'm still hanging in there. Sometimes I get frustrated, but my teacher says it's all part of learning.

"When I learned to email my friend in Yellowknife, I thought that was interesting. Last week, when I had to go down there for a doctor's appointment, I e-mailed her and we got together for lunch. Email is much cheaper than calling. The computer at the school is free.

"Now they are teaching me research. You can ask questions and what you need to know is right there — in the computer. They gave us a disk to record what we do. I save all of my information. The best part of learning the computer is the research. I like going back and looking at the history of this place, and learning about the land and the rivers."

## PROFILE

---

**Jeri Miltenberger is a librarian in Fort Smith. She has been traveling throughout the Northwest Territories to establish cyber-libraries in remote hamlets and provide computer training.**

"I came up here to Fort Smith 25 years ago as a young bride and stayed. My husband's family was here. I've been a librarian for 15 years, long before computers came along. Once we started to get computers, I was always the one who tested the new software and solved the glitches. When we started this project to put computers in the libraries for the general public to use and to create the cyber-libraries, I guess the job just naturally fell to me.

"The best part of this work is seeing people get over being intimidated by computers and start to use them. I have a group of seniors that comes in here three days a week now for basic computer training. One man just learned how to send email to his granddaughter. She had lived in Fort Smith, but has moved thousands of miles away. Now he checks every day for email. The connection they might have lost is strengthened. He's still timid around the technology, but he sees its potential.

"I just got back from helping to set up a computer and conduct training in Fort Liard (pop. 550). First we had to fly north and then get on another small plane and fly east. Then we had to drive for three hours on snow and ice. We drove a four-wheel drive. I'll tell you: there's not a lot of traffic out there! When you travel like this you take candles, matches, food, first aid. You have to be prepared, in case the car breaks down or something happens.

### Northwest Territories (continued)

---

"It's beautiful up there, all mountains and timber. There are no paved roads in Fort Liard, just little houses, a school, a store, that sort of thing. The hospitality is great. People are always enthusiastic to see us when we come to set up the cyber-libraries. They feed us; they put us up. Everybody knows everybody. They are all part of extended families, many of which go back for generations in the area.

"My hope is that by training the kids, their enthusiasm will draw other people in. I hope they will say, 'Come here, I'll show you' to their uncles and grandparents and sisters, and it will grow from there."

## MAKING THE CONNECTION

---

If you board an airplane in Seattle and fly toward the North Pole, you pass over a mythic terrain of lakes and rivers, mountains and tundra, snow and ice. It is the land of the Aurora Borealis, and of long summer days and endless winter nights. The vast Canadian Northwest Territories are still home to great herds of caribou, and to grizzlies, polar bears, and whales. The landscape is dotted with 32 hamlets, towns, and villages, many accessible only by plane or snowmobile during the dark winter months. Where roads exist, travelers must drive for many miles over treacherous snowfields to reach their destinations.

Forty-two thousand people live in these beautiful and forbidding environs. More than a dozen aboriginal languages are spoken by the region's First Peoples, who account for about half the population. Mining, trapping, tourism, and subsistence hunting provide a hardscrabble livelihood for some. Gas and oil development are making inroads, bringing much-needed jobs and changing the land and the way of life forever.

Nowhere is the "digital divide" more evident than in the remote hamlets of the Northwest Territories. Only nine communities in the territories have public libraries; the remaining communities have managed without. Now the Northwest Territory Library Services has launched a project to place computer workstations and provide Internet access in the existing libraries, and to create a system of cyber-libraries in six remote communities. The computers and Internet access, along with training and software, will enable residents to enter a world far beyond the territorial boundaries, to participate in the Information Age, and to pursue their own interests in education, communication, research, and entertainment.

The logistics of creating the cyber-libraries has been daunting, but people in the villages have teamed up to make it happen. Three cyber-libraries are already wired and operational. Librarian Jeri Miltenberger and computer technician Ciaran Coates have trekked hundreds of miles to work with school officials, teachers, and community leaders to establish the computer workstations in schools and community centers. The public is invited to use the computers, usually during the afternoons and evenings, and is provided with computer training.

Miltenberger and Coates train high school students in each village. The students earn credit and a certificate in computer competency. The student-volunteers manage the computer workstations and

**Northwest Territories (continued)**

---

train others, as part of the certificate requirements. The young people's enthusiasm and knowledge ignites the curiosity of others in the community. Parents and grandparents are becoming more confident, sending emails to family members and doing research on the World Wide Web for the first time. The computers give users access to the NWT Library Services borrow-by-mail program, interlibrary loans throughout Canada, and a range of online research materials.

"We needed a way to reach people in communities who didn't have access to computers—few people out there have computers at home; it's just not affordable," says Sandy McDonald, territorial librarian for NWT Library Services. "But now library services will be available to many more people, and they will be able to use the resources of the Internet, too. It's very promising."

---

**GRANT SUMMARY****Northwest Territories Libraries**

\$219,219 (USD) for computers and Internet access for NWT public libraries, including six cyber-libraries in communities without library buildings.

STORIES OF INSPIRATION

OPPORTUNITY

## GATES MILLENNIUM SCHOLARS

GATES MILLENNIUM SCHOLARS come from every state in the country and attend this nation's top colleges and universities. Students selected for this program represent the best and brightest of today's high achieving youth. These are low-income minority students with tremendous academic promise, demonstrated leadership skills and unmet financial need. In its inaugural year, the Gates Millennium Scholars program expanded access to higher education for 4,000 students; over its 20-year life, the program will provide scholarships to more than 20,000 students.

### PROFILE

**Hai Nguyen, a freshman at the University of Washington, plans to major in pre-med on her way to becoming a pediatrician, a vocation she believes will allow her to "help young minds and bodies develop to their full potential."**

A Vietnamese-American, Hai's parents immigrated to the United States over 20 years ago in the hopes of finding greater opportunity for their four children. In high school, Hai played tennis for the Evergreen High School Bobcats and graduated among the top in her class. Her ambition to be a future leader was evident in her participation in student government and in her role as a page for the Washington State legislature.

### Gates Millennium Scholars (continued)

---

"I try to always get involved and find new and exciting opportunities," she explains. Despite a long list of extracurriculars, Hai has always made time for serving others, including volunteer work at a hospital and nursing home. She has recently returned from a summer study in Japan where she was a Youth For Understanding student, living, learning, and of course, volunteering, within a Japanese community.

As a newcomer to the University of Washington, she admits the massive size is "a little overwhelming," but laughs it off with a confident and determined smile, welcoming its challenges and endless possibilities.

## PROFILE

---

**Nicolas Carrasco, a graduate student in biochemistry at City University of New York, attributes his interest in biology and chemistry to growing up in the countryside of the Dominican Republic. "I was always in close relation to nature," he explains. "We were surrounded by trees and my family were farmers."**

After moving to the United States, Nicolas faced many challenges. He didn't speak English and he lived in a neighborhood overrun with crime and drugs. Nicolas attended night school and worked in a metal factory by day to help his family. He received his GED and later graduated from Brooklyn College with a biology degree. When asked what advice he has for young people, he says, "Be patient. Be committed. Improve your life through education."

Today, Nicolas is completing research using x-ray crystallography. As he describes the intricate details of working with ribosomes, he modestly says he hopes that one day his work will help people by improving the effectiveness of their medications.

He credits his success to support from professors and family, particularly his mother, whom he tenderly refers to as his "first professor." "I remember when she took my hands to help me learn to write," he recalls. "My mother put a lot of love and trust in us."

### GRANT SUMMARY

---

#### **United Negro College Fund**

\$1,000,000,000 over 20 years to support the Gates Millennium Scholars Program.

## 2000 GRANTS

### GRANTS AWARDED

\* "Grants Awarded" refers to new commitments made in 2000 to fund a grantee over a specific time frame.

## 2000 GRANTS

### GLOBAL HEALTH: CONDITIONS ASSOCIATED WITH POVERTY

Each year, more than 11 million children and 7 million adults die premature and preventable deaths due to diseases of poverty. Foundation grantmaking focuses on preventing disease, disability, and death among those living in poverty.

**African Comprehensive HIV/AIDS Partnerships, Inc. (Dover, DE)** \$50,000,000 for 5 years to support the Botswana Comprehensive HIV/AIDS Partnership.

**American Friends of London School of Hygiene & Tropical Medicine Inc. (London, United Kingdom)** \$40,000,000 for 5 years to establish the Malaria Center.

**Britain-Nepal Medical Trust (Tonbridge, Kent – United Kingdom)** \$659,172 for 2.5 years to support the Tuberculosis/Leprosy Control Program in Nepal.

**Carter Center, Inc., The (Atlanta, GA)** \$741,000 for 3 years to reactivate the International Task Force for Disease Eradication.

**Chancellor Masters & Scholars of the University of Oxford (Oxford, United Kingdom)** \$4,782,000 for 2 years to support the Tak Malaria Initiative to accelerate global efforts to control the emergence and spread of resistance to antimalarial drugs.

**Elizabeth Glaser Pediatric AIDS Foundation (Santa Monica, CA)** \$15,000,000 for 3 years to support Call to Action: A Global Program to Prevent Mother-to-Child Transmission of HIV.

**Family Planning Association of Pakistan (Lahore, Pakistan)** \$1,377,325 for 5 years to provide high-quality family planning services in Pakistan.

**Francois-Xavier Bagnoud US Foundation (New York, NY)** \$300,000 for 3 years to support the HIV/AIDS/STD Prevention Program in Rural Rajasthan, India.

**Funders Concerned About AIDS Inc (New York, NY)** \$20,000 for 1 year for general support.

**Global Alliance for TB Drug Development (New York, NY)** \$25,000,000 for 5 years to support the development of new therapeutic agents.

**Global Health Council, Inc. (Washington, DC)** \$4,800,000 for 3 years to support the expansion of outreach and networking efforts on key global health issues.

**Harvard University (Boston, MA)** \$44,712,896 for 5 years to support the Partnership for Tuberculosis Control.

**Harvard University (Cambridge, MA)** \$650,000 for 1 year to support the commission on macroeconomics and health.

**Health Systems Trust (Durban, South Africa)** \$7,000,000 for 3 years to support LoveLife Healthy Adolescents HIV/AIDS Campaign to reduce the incidence of HIV infection among young South Africans.

**Indian Council for Research on International Economic Relations (New Delhi, India)** \$100,000 for 1 year to provide a research study to the Commission for Macroeconomics in Health on the current state of health systems in India.

**International HIV/AIDS Alliance (London, United Kingdom)** \$5,000,000 for 5 years to support the expansion of community action on AIDS in developing countries.

**International Society for Infectious Diseases (Boston, MA)** \$963,138 for 2 years to support ProMED-mail, an email-based emerging disease detection and reporting system.

## 2000 GRANTS

### 2000 Grants for Global Health (continued)

**International Trachoma Initiative, Inc. (New York, NY)**

\$20,000,000 for 5 years to eliminate blinding trachoma in ten countries and to further improve the tools for fighting trachoma.

**Johns Hopkins University, The (Baltimore, MD)**

\$20,000,000 for 5 years to establish the Gates Micronutrient Initiative to protect the health of women and children by eliminating vitamin A and related micronutrient deficiencies.

**Medicines for Malaria Venture (Geneva, Switzerland)**

\$25,000,000 for 5 years to promote the discovery and development of antimalarial drugs.

**Pan American Health and Education Foundation**

**(Washington, DC)** \$4,962,100 for 3 years to improve the safety of blood for transfusion in the region of the Americas.

**Peace Corps Institute (Washington, DC)** \$500,000 for

1 year to address the devastating health, social, and economic effects of the HIV/AIDS epidemic.

**Petrolia School, The (Petrolia, CA)** \$180,484 for 1 year

to support the Ray of Hope Project for child protection in the family and community.

**PLAN International USA, Inc. (Arlington, VA)**

\$1,000,000 for 1 year to support Bringing Hope to Children: Community-Based Solutions for African Children Affected by HIV/AIDS.

**President and Fellows of Harvard College (Boston, MA)**

\$731,045 for 2 years to support the Schistosomiasis Control Initiative.

**Queen's University (Kingston, ON – Canada)** \$765,000

for 3 years to develop an antimalaria therapy to prevent the entry of the malarial parasite into the host cells and tissues of infected humans.

**Royal Government of Bhutan (Thimphu, Bhutan)**

\$1,000,000 for 1 year to support the Bhutan Health Trust Fund.

**Tech Foundation (Cambridge, MA)** \$33,511.20 for 1

year to support an Internet Café for the women participating in Women 2000: Gender Equality, Development and Peace in the 21st Century.

**United States Committee for UNFPA, Inc. (New York, NY)**

\$80,000 for 1 year to produce the documentary "Lives Together, Worlds Apart."

**United States Fund for UNICEF (New York, NY)**

\$15,000,000 for 5 years to support the elimination of Iodine Deficiency Disorder.

**University of Lausanne (Lausanne, Switzerland)**

\$350,000 for 1 year to support the Commission for Macroeconomics and Health.

**University of North Carolina at Chapel Hill (Chapel Hill, NC)**

\$15,114,000 for 5 years to support the development of novel drug candidates for the treatment of human African trypanosomiasis and leishmaniasis.

**University of Witwatersrand Fund, Inc. (Johannesburg, South Africa)**

\$455,000 for 1 year to support the Palliative Medicine Institute.

**World Bank, The (Washington, DC)** \$28,500,000 for 6

years to support the Dracunculiasis Eradication Trust Fund.

**World Bank, The (Washington, DC)** \$20,000,000 for 5

years to support the Global Alliance for the Elimination of Lymphatic Filariasis.

**World Health Organization (Geneva, Switzerland)**

\$10,000,000 for 5 years to advance the assessment of diagnostic tools necessary to enhance tuberculosis control through improved case detection and targeted treatment.

## 2000 GRANTS

### 2000 Grants for Global Health (continued)

#### GLOBAL HEALTH: REPRODUCTIVE AND CHILD HEALTH

Reproductive health care is the primary health need of women, yet limited resources in developing countries combined with women's economic and social position often deprive women of access to the care they need and want. Increasing access to voluntary family planning services and providing emergency obstetrical care to enable women to safely carry and deliver babies are examples of the kinds of work supported by the foundation.

**Deepam Educational Society for Health (Alwarpet, Chennai – India)** \$1,001,077 for 3 years to support the reproductive health program in India.

**Equilibres et Populations (Paris, France)** \$1,000,000 for 3 years to mobilize support in the French, European, and global francophone communities for reproductive health and education activities.

**Facing the Future: People and the Planet (Lopez Island, WA)** \$150,000 for 3 years to support solutions-oriented education and outreach programs on population and development issues.

**Family Care International, Inc (New York, NY)** \$2,000,000 for 2 years to bring greater visibility and understanding to Safe Motherhood issues.

**Family Care International, Inc (New York, NY)** \$8,040,337 for 5 years to provide technical assistance and educational resources to reduce maternal mortality through the promotion of skilled birth attendants at home deliveries.

**FUNDEVI-Universidad de Costa Rica (San Jose, Costa Rica)** \$800,000 for 4 years to support the Central American Center for Population Studies and Training.

**Global Health Council, Inc. (Washington, DC)** \$150,000 for 1 year to support U.S. education and outreach on key health issues related to the 2001 world summit for children.

**Global Health Council, Inc. (Washington, DC)** \$10,000 for 1 year to support the White Ribbon Alliance for Safe Motherhood.

**Instituto Chileno de Medicina Reproductiva (Santiago, Chile)** \$2,805,157 for 3 years to develop human resources for reproductive health in Latin America.

**International Planned Parenthood Federation (London, United Kingdom)** \$8,865,000 for 5 years to strengthen the quality of reproductive healthcare.

**Medical College of Hampton Roads (Arlington, VA)** \$25,000,000 for 5 years to research the feasibility, safety, and efficacy of several promising antimicrobials and contraceptives.

**Partners in Population and Development (Dhaka, Bangladesh)** \$3,000,000 for 3 years to support the Global Training Program in Reproductive Health and Population: A Framework of Enhanced South-to-South Cooperation.

**PATH (Seattle, WA)** \$7,348,329 for 5 years to support family planning programs in China.

**Population Action International (Washington, DC)** \$1,000,000 for 1 year to develop a comprehensive global strategy for ensuring reproductive health commodity security.

## 2000 GRANTS

### 2000 Grants for Global Health (continued)

**Population Concern (London, United Kingdom)**

\$450,000 for 3 years to expand the Andean Initiative, designed to meet the reproductive health needs of young people across Bolivia and Peru.

**President and Fellows of Harvard College (Boston, MA)**

\$25,000,000 for 5 years to support AIDS prevention in Nigeria.

**Public Health Institute (Berkeley, CA)**

\$200,000 for 1 year to launch the Global Action Network, an online community designed to connect, educate, and empower young people working in the global population and reproductive health field.

**Save the Children Federation, Inc. (Westport, CT)**

\$50,456,000 for 5 years to support the Global Neonatal Survival Initiative.

**Trustees of the University of Pennsylvania**

**(Philadelphia, PA)** \$4,950,000 for 3 years to develop new tools to predict and prevent the leading causes of maternal death: ectopic pregnancy, premature rupture of fetal membranes, and preeclampsia.

**United States Committee for UNFPA, Inc. (New York, NY)**

\$56,681,270 for 5 years to support the African Youth Alliance.

**United States Committee for UNFPA, Inc. (New York, NY)**

\$243,000 for 1 year to support contraceptive logistics and management information systems in Myanmar (Burma).

**United States Fund for UNICEF (New York, NY)**

\$849,225 for 1 year to support communication strategies and key activities for the Global Movement for Children.

**Vaestoliitto ry, The Family Federation of Finland**

**(Helsinki, Finland)** \$1,000,000 for 3 years to support international reproductive health services.

**World Health Organization (Geneva, Switzerland)**

\$10,000,000 for 5 years to support research for the reduction of child mortality.

**World Population Foundation (Hilversum, The Netherlands)**

\$1,000,000 for 1 year to support reproductive health and family planning services in Asia.

## 2000 GRANTS

### 2000 Grants for Global Health (continued)

#### VACCINE PREVENTABLE DISEASES

Vaccines are the foundation of infectious disease control and represent the best hope for improving the health and well-being of the world's poorest children. Foundation priorities include expanding access to life-saving vaccines for the world's poorest children and developing new vaccines against diseases such as HIV/AIDS, tuberculosis, and malaria.

**Albert B. Sabin Vaccine Institute, Inc., The (New Canaan, CT)** \$500,000 for 5 years to support the annual Vaccine Colloquia.

**Albert B. Sabin Vaccine Institute, Inc., The (New Canaan, CT)** \$18,000,000 for 6 years to develop a genetically engineered recombinant hookworm vaccine to be used with traditional methods to reduce one of the main causes of anemia and malnutrition.

**Infectious Disease Research Institute (Seattle, WA)** \$15,000,000 for 4 years to develop a vaccine for leishmaniasis.

**Johns Hopkins University, The (Baltimore, MD)** \$21,400,000 for 5 years to develop a stealth measles vaccine.

**Management Sciences for Health, Inc. (Boston, MA)** \$29,957,826 for 5 years to establish the Gates Drug Management Center to provide sustainable access to priority drugs, vaccines, and essential health commodities in underserved areas.

**U.S. Civilian Research & Development Foundation For Independent State Of The Former Soviet Union (Arlington, VA)** \$170,092 for 8 months to perform a feasibility study to improve vaccine manufacturing and delivery in Russia.

**United States Fund for UNICEF (New York, NY)** \$300,000 for 1 year to support the GAVI Secretariat.

**University of Maryland (College Park, MD)** \$20,360,592 for 5 years to develop a stealth measles vaccine.

**University of Southern California (Los Angeles, CA)** \$40,000 for 1 year to support the Vaccine Leadership Conference.

## 2000 GRANTS

### INTERNATIONAL LIBRARY GRANTS

The foundation partners with public libraries serving the general public in locations as diverse as Canada and Chile, supporting innovative programs that enable all individuals to improve their lives with information and technology.

**Alberta Library (Edmonton, AB – Canada)** \$901,296 for 1 year to support Alberta's public libraries serving low-income communities with a gift of public access computers, Internet access, and training of library staff.

**Direccion de Bibliotecas, Archivos y Museos-(DIBAM) (Santiago, Chile)** \$7,387,000 for 1 year to provide public access to computers and Internet access to libraries in Chile.

**Helsinki City Library (Helsinki, Finland)** \$1,000,000 for 1 year to confer the Access to Learning Award in recognition of their outstanding efforts to provide public access to computers and the Internet in useful and innovative ways.

**Medical Library Association, Inc. (Chicago, IL)** \$30,000 for 1 year to enable ten international librarians to attend the IFLA 2001 Conference in Boston, MA.

**Northwest Territories Public Library Services (Hay River, NT – Canada)** \$219,219 for 1 year to support Northwest Territories' public libraries serving low-income communities with a gift of public access computers, Internet access, and training of library staff.

**Quebec Ministere de la Culture et des Communications (Quebec City, QP – Canada)** \$5,471,562 for 1 year to support Quebec's public libraries serving low-income communities with a gift of public access computers, Internet access, and training of library staff.

**Saskatchewan Library Association (Regina, SK – Canada)** \$636,956 for 1 year to support Saskatchewan's public libraries serving low-income communities with a gift of public access computers, Internet access, and training of library staff.

**Yukon Department of Education (Whitehorse, YT – Canada)** \$150,364 for 1 year to support Yukon's public libraries serving low-income communities with a gift of public access computers, Internet access, and training of library staff.

**Yukon Department of Education (Whitehorse, YT – Canada)** \$52,055 for 1 month to support Yukon's public libraries serving low-income communities by establishing an 11 workstation computer-training lab.

## 2000 GRANTS

### PUBLIC ACCESS TO INFORMATION GRANTS

Alongside efforts to bring technology to schools and public libraries in underserved areas, the foundation is partnering with local leaders to develop models for public access computing across a wide array of community spaces.

**Benton Foundation (Washington, DC)** \$40,000 for 1 year to support the Digital Divide Network.

**Evergreen Children's Association (Seattle, WA)** \$47,455 for 1 year to support high-quality child care through the use of information technology.

**First Place (Seattle, WA)** \$90,000 for 2 years to provide high-quality computer equipment for the classroom, to purchase and install a computer lab in its new building at time of occupancy, and to define required support services.

**Museum of Science (Boston, MA)** \$601,146 for 3 years to support community-based technology education programs, providing safe, caring environments to underserved communities.

**Oregon State University (Corvallis, OR)** \$12,000 for 1 year to support the Pathways to Power web camp.

**Rose City Park United Methodist Church (Portland, OR)** \$14,470 for 1 year to support a youth and community program designed to teach computer and technical skills.

**South Everett Youth and Community Center Incorporated (Everett, WA)** \$20,000 for 1 year to support basic skills and school completion program for at-risk youth.

**Technology Access Foundation (Seattle, WA)** \$188,055 for 2 years to support the administration of the West Seattle Learns community computer lab program.

**Tilden Library Foundation, The (Tilden, NE)** \$41,250 for 1 year to establish a technology center.

**Wilderness Technology Alliance (Bellevue, WA)** \$7,890 for 1 year to support programs to provide project-based technology education programs for at-risk youth.

**World Resources Institute (Washington, DC)** \$200,000 for 19 months to support 'Creating Digital Dividends: Applying Digital Technologies for Sustainable Development.'

## 2000 GRANTS

### EDUCATION

The education programs of the foundation were launched in March 2000, with a \$350 million commitment to support education improvements in three priority areas: model schools and districts; professional development opportunities for teachers, principals, and superintendents; and scholarships to broaden access to higher education.

**Alaska Council of School Administrators (Douglas, AK)** \$4,974,112 for 5 years to provide technical assistance to six rural, low-income, culturally diverse Alaska school districts.

**Alliance for Education (Seattle, WA)** \$191,950 for 2 years to contribute to the academic achievement of all Seattle School District students by making them effective users of ideas and information through their school librarians.

**Alliance for Education (Seattle, WA)** \$24,960,000 for 5 years to improve teaching and learning by enhancing student access to technology.

**Arkansas Department of Education (Little Rock, AR)** \$1,663,110 for 3 years to provide superintendents and principals from public and private schools access to quality leadership development focused on technology integration and whole systems change.

**Aspire Public Schools (San Carlos, CA)** \$3,187,000 for 5 years to design and open five small charter high schools in the next three years.

**Bay Area Coalition of Essential Schools (Oakland, CA)** \$15,721,427 for 5 years to support the Small Schools Initiative.

**Bellingham School District 501 (Bellingham, WA)** \$4,326,400 for 5 years to improve teaching and learning by enhancing student access to technology.

**Big Picture Company Inc (Providence, RI)** \$3,450,000 for 5 years to change how people think about high school education by modeling and building new small schools.

**Board of Trustees of the Leland Stanford Junior University, The (Stanford, CA)** \$4,829,198 for 5 years to create a learning collaborative under Stanford University's College of Education's leadership to help school leaders develop a broader knowledge base about school design, teaching and learning, curriculum and assessment, and professional development.

**Burlington-Edison School District (Burlington, WA)** \$216,000 for 3 years to support personalized learning environments where all students achieve.

**Cataldo Catholic School (Spokane, WA)** \$156,000 for 3 years to support personalized learning environments where all students achieve.

**Center for Collaborative Education Metro Boston Inc (Boston, MA)** \$4,914,021 for 5 years to support existing small schools, work with districts to launch up to 20 new small schools over the next five years, serve as a clearinghouse of research on small schools, and develop a cadre of new small school leaders.

**Center for Community Service Fund (Seattle, WA)** \$2,750,000 for 16 months to provide superintendents and principals from public and private schools access to quality leadership development focused on technology integration and whole systems change through the Smart Tools Academy.

**Centralia School District (Centralia, WA)** \$172,000 for 3 years to support personalized learning environments where all students achieve.

## 2000 GRANTS

### 2000 Grants for Education (continued)

**Charles N. Fortes Magnet Academy (Providence, RI)** \$10,000 for 1 year to support Charles N. Fortes Magnet Academy in their mission to show the value of small schools in providing a quality education to all children.

**Communities in School, Inc. (Alexandria, VA)** \$300,000 for 3 years to help build capacity to serve at-risk students throughout the nation by bringing resources, services, parents, and volunteers into schools to meet students' needs so they can concentrate on learning.

**Communities In Schools of Washington State (Seattle, WA)** \$300,000 for 3 years to meet its mission to help young people stay in school, successfully learn, and prepare for life.

**Community Studies, Inc. (New York, NY)** \$100,000 for 4 years to support the Teacher Center.

**Community Studies, Inc. (New York, NY)** \$4,290,220 for 5 years to support 39 New York City high schools in educational reform for small schools and performance assessment coalition over the next five years.

**Cross City Campaign for Urban School Reform (Chicago, IL)** \$35,000 for 1 year to support the annual meeting in Baltimore on October 26-29, 2000.

**Edmonds School District (Lynnwood, WA)** \$100,000 for 1 year to support implementation of a model information technology program at Lynnwood High School.

**Edmonds School District (Lynnwood, WA)** \$179,600 for 3 years to support personalized learning environments where all students achieve.

**Education Resources Institute Inc, The (Boston, MA)** \$75,000 for 1 year to increase college preparation, access, and success for students from groups currently underrepresented in higher education.

**EdVisions, Inc. (Henderson, MN)** \$4,430,000 for 5 years to develop a minimum of fifteen new schools over the next five years, create a network of these schools, and disseminate the successful practices of the New Country School and the network around the nation.

**Enumclaw School District (Enumclaw, WA)** \$2,217,000 for 5 years to improve teaching and learning by enhancing student access to technology.

**Evergreen School District #114 (Vancouver, WA)** \$8,959,808 for 5 years to improve teaching and learning by enhancing student access to technology.

**Florida Department of Education (Tallahassee, FL)** \$5,499,727 for 3 years to provide superintendents and principals from public and private schools access to quality leadership development focused on technology integration and whole systems change.

**Foundation for Educational Administration, Inc. (Monroe Township, NJ)** \$5,100,000 for 2 years to provide superintendents and principals from public and private schools access to quality leadership development focused on technology integration and whole systems change.

**Fund for Colorado's Future, The (Denver, CO)** \$1,631,000 for 2 years to provide superintendents and principals from public and private schools access to quality leadership development focused on technology integration and whole systems change.

**High Tech High Foundation (San Diego, CA)** \$6,395,373 for 5 years to develop High Tech High in San Diego and replicate the program in nine other communities.

**Hispanic Scholarship Fund (San Francisco, CA)** \$220,000 for 1 year to provide scholarships in environmental sciences and other scientific fields in which Hispanics are historically underrepresented.

## 2000 GRANTS

### 2000 Grants for Education (continued)

**Hockinson School District #98 (Brush Prairie, WA)** \$884,417 for 5 years to improve teaching and learning by enhancing student access to technology.

**Illinois State University (Normal, IL)** \$2,250,000 for 3 years to provide superintendents and principals from public and private schools access to quality leadership development focused on technology integration and whole systems change.

**Indiana Department of Education (Indianapolis, IN)** \$1,800,000 for 3 years to provide superintendents and principals from public and private schools access to quality leadership development focused on technology integration and whole systems change.

**Institute of Computer Technology (Sunnyvale, CA)** \$4,500,000 for 1 year to support and enhance the Intel 'Teach to the Future' program by training master teachers.

**Institute of Computer Technology (Sunnyvale, CA)** \$10,000,000 for 1 year to expand the Intel Teach to the Future Program from 500 master teachers in 2000 to 1500 teachers in 2001.

**International Society for Technology in Education (Eugene, OR)** \$1,050,000 for 3 years to support the Center for Applied Research in Educational Technology.

**Kennewick School District # 17 (Kennewick, WA)** \$7,030,400 for 5 years to improve teaching and learning by enhancing student access to technology.

**Lake Washington School District (Kirkland, WA)** \$54,000 for 3 years to support personalized learning environments where all students achieve.

**Louisiana Department of Education (Baton Rouge, LA)** \$1,200,000 for 4 years to provide superintendents and principals from public and private schools access to quality leadership development focused on technology integration and whole systems change.

**Mabton School District #120 (Mabton, WA)** \$558,000 for 5 years to improve teaching and learning by enhancing student access to technology.
